

THE SENTRICON® SYSTEM COMMERCIAL-GRADE TERMITE PROTECTION.

The Sentricon® System solves termite concerns for commercial property managers of:

- Multifamily housing
- Schools, hospitals and health care facilities
- Hotels and hospitality facilities
- Factories and warehouses
- Government and military buildings
- Food processing and manufacturing facilities
- Buildings where service-related disruption needs to be minimized
- Large or complex structures

POWERFUL PROTECTION.

Following a complete inspection, your Certified Sentricon Specialist™ will install in-ground bait stations around the property perimeter. Foraging termite workers find and share the bait with their colony. The result as documented by more than 60 scientific studies: The colony — including its queen, the ultimate source of the problem — dies. Sentricon then stays in place, protecting against attack by new termite colonies.

1 INSPECT

A Certified Sentricon Specialist checks for signs of termites.

2 INSTALL

Stations are placed around the property, and the bait immediately begins working.

3 SERVICE

Your Certified Sentricon Specialist makes sure the stations are always working.

ELIMINATE THE COLONY.

SENTRICON

EASY ON PROPERTY AND PEOPLE.

With The Sentricon® System, there's no structural drilling, trenching around buildings or injecting liquid chemicals into the soil. The ability to eliminate termite colonies without impacting property has made Sentricon the solution to protect historic sites, such as the White House.

The active ingredient in the Sentricon System was developed specifically to stop the natural growth of termites. The mode of action poses no hazard to people or pets, and the bait is installed below the soil surface inside tamper-resistant bait stations.

REVOLUTIONARY BY DESIGN.

- Sentricon is the only termite product to receive the Presidential Green Chemistry Challenge Award by the U.S. Environmental Protection Agency (EPA).
- Sentricon was the first pesticide registered under the EPA's Reduced Risk Pesticide Initiative.
- Sentricon with Always Active™ technology means all stations are baited on Day One, providing immediate protection against termites.
- Once-a-year service frequency provides exceptional value as well as exceptional property protection.
- Installation and maintenance by a Certified Sentricon Specialist ensures quality service.
